

# Mohd Sameer Backend Software Engineer · Java, Spring Boot, AI/LLM Systems · 2+ yrs

✉ sameermohd2k1@gmail.com ☎ 8454092949 🌐 [Github](#) [LinkedIn](#) [Portfolio](#) [leetcode](#)

## SKILLS

- **Languages** — Java, SpringBoot, SQL/PLSQL, Python, FastAPI, JavaScript, HTML/CSS
- **Backend** — Kafka, Redis, JWT, OIDC, OAuth 2.0, Multithreading, JUnit/Mockito, Spring Data JPA/Hibernate/ORM
- **Data** — Oracle DB, PL/SQL, PostgreSQL, pgvector, Flyway, Firebase, Supabase, MySQL
- **Infra & Tools** — Docker, Kubernetes, AWS(S3, Bedrock, RDS, IAM, EC2, CloudWatch), Azure(OIDC Entra ID), OCI(Object Storage, Vault), Jenkins CI/CD, Autosys, Unix/Shell, Git, Maven, Swagger
- **AI Systems** — RAG, semantic embeddings & vector search, MCP, Agentic pipeline, Evals, Guardrails, Orchestration
- **Practices** — Agile/Scrum, system design(HLD/LLD), code reviews, AI Assisted development, Microservices, Event Driven Architecture, SOLID, OOPs, Distributed Systems, SDLC, Secure Coding

## PROFESSIONAL EXPERIENCE

**Associate Consultant-Backend Engineer**, Oracle Financial Services Software **Aug 2024 – Present** | Mumbai, India  
*Backend engineer on a portfolio management platform for a global investment bank and an internal SQL AI platform.*

**AI Analytics Platform (NL to SQL)** · Python, Fast API, React, Oracle GenAI, AWS Bedrock/S3, Docker, Kubernetes

- Worked with team to build an agentic NL-to-SQL pipeline with intent analysis, semantic retrieval, knowledge graph.
- Agents also performs SQL validation, PII redaction, performance checks, read-only enforcement blocking DDL/DML.
- Added cloud features for using models, storing files, and db wallets with AWS Bedrock, S3, Secrets Manager and OCI.
- Worked on Multi tenant RBAC in application. Deployed the Python/React stack with Docker and Kubernetes.
- Used Codex for code generation, refactoring, tests and docs, including custom agents for repetitive tasks.

**Portfolio Management Platform** · Java 21, Spring Boot, Oracle PL/SQL, React, Autosys JIL

- Worked on Autosys JIL loaders and Java service for the EOD portfolio data with multithreading ExecutorService and managed React dashboard with Tanstack Query for server state caching.
- Integrated Azure Entra ID (OIDC) with JWT access/refresh tokens and group based authorization in our application.
- Rewrote Rest APIs for CSV loaders (80K-100K rows/file) using the factory pattern for multiple transaction types and bulk batch inserts to reduce the load time from 2 min to under 10 sec.
- Tuned PL/SQL with indexing, added CTEs for repeated SQL code and wrote db migration scripts for few tables.
- Fixed AI Copilot suggested tasks for vulnerability patches(SQL Injection), memory leaks and other sonar issues.

**Frontend Web Developer Intern**, 50Fin

**Jul 2023 – Aug 2023** | Bangalore, India

- Built the company's responsive site from scratch in React, improving average page response time by ~1.1 seconds.
- Set up CI/CD with GitHub Actions for automatic deployment to Firebase Hosting on every push to the main branch.

## PROJECTS

**MCP server that gives AI tools persistent and searchable memory across conversations** [🔗](#),

Java 21, Spring Boot, React, Kafka, Postgres + pgvector, Redis, Docker, MCP

- Memory layer for AI Tools, you save notes/facts once, and any AI tool (like Claude) can later search and recall them by meaning across separate conversations. Built on MCP standard so any MCP client can read/write/delete from memory.
- Built the ingestion pipeline with Kafka, text is split into chunks, turned into embeddings in batches (with retries if the API call fails), and saved by consumers that skip duplicates(Idempotent) to avoid duplicate rows.
- Built hybrid search that combines vector similarity (pgvector with an HNSW index) and keyword search (Postgres full-text search), then merges both ranked lists into one, also added a Redis cache for repeated questions and a per user rate limiter using token bucket algorithm. Also Added Flyway database migrations, stateless JWT login.

## EDUCATION

**Bangalore Institute of Technology**, B.E. Information Science & Engineering  
CGPA: 8.89

**2020 – 2024** | Bangalore, India

## CERTIFICATES

[Oracle Certified Java SE 17 Developer](#) [🔗](#), [OCI Generative AI Professional \(2025\)](#) [🔗](#), [Oracle DB 23ai](#) [🔗](#), [PL/SQL 19c](#) [🔗](#)

## ACHIEVEMENTS

**Oracle Code-Contest '24 (Winner) and AI Ideathon (top 5 runner up) '25**, Oracle Financial Services Software

**HACKMAN.v6 Hackathon Winner 2023** [🔗](#), Dayananda Sagar College of Engineering, Bangalore

**Polygon Bangalore Event Guild Lead** [🔗](#), Polygon Blockchain
