PROFESSIONAL EXPERIENCE

Associate Consultant, Oracle Financial Services Software **Aug 2024 – Present** | Mumbai, India

Backend engineer on a portfolio-management platform for a global investment bank (Java, Spring Boot, PL/SQL, React)

- Optimized CSV data loaders handling 80K–100K rows per file by replacing per row inserts with bulk batch inserts, reducing load time from 2 minutes to under 10 seconds, with daily runs scheduled using Autosys.
- Building a report generation engine that runs dynamic SQL over end-of-day position tables, using Java ExecutorService for parallel asynchronous processing and a React dashboard for users.
- Worked on a simulation where portfolio managers test hypothetical trades and analyze impact on holdings.
- Improved application performance and operational stability by tuning slow PL/SQL queries with indexing and CTEs, and resolved memory leaks and production issues through Unix log analysis.
- Owned features end to end in an Agile team through UAT to production: REST APIs, database migrations, Jenkins CI/CD, single-jar deployments serving React from Spring Boot, and SSH deployments.
- Building an internal analytics platform that converts natural language to SQL (Python, React, Oracle GenAI), with multi-tenant access control, embedding-based retrieval and prompt injection safeguards, on Docker and Kubernetes.
- Use enterprise approved Copilot (GPT/Claude) for code generation, refactoring, unit tests and documentation.

Frontend Web Developer Intern, 50Fin

Jul 2023 – Aug 2023 | Bangalore, India

- Built the company's responsive site from scratch in React, improving average page response time by ~1.1 seconds.
- Set up CI/CD with GitHub Actions for automatic deployment to Firebase Hosting on every push to the main branch.

PROJECTS

Mnemo, MCP server that gives AI tools persistent, searchable memory across conversations [🔗](#),

Java 17, Spring Boot, Kafka, Postgres + pgvector, Redis, Docker, MCP (GitHub), React

- Built the ingestion pipeline with token-aware text chunking, batched embedding calls with retries, and idempotent Kafka consumers so duplicate events never create duplicate rows.
- Designed the system architecture and search layer: HNSW and GIN indexes, full-text search columns, Flyway migrations, and hybrid search combining vector similarity with keyword matching.
- Implemented testing with unit tests using JUnit and Testcontainers against real Postgres and Kafka, plus a stateless Spring Security configuration using JWT and a log redaction filter keeping user content out of logs.

EDUCATION

Bangalore Institute of Technology, B.E. Information Science & Engineering
CGPA: 8.89

2020 – 2024 | Bangalore, India

SKILLS

Languages

Java, SQL/PLSQL, Python, JavaScript

Backend

Spring Boot, Kafka, Redis, REST APIs, Maven, JUnit, Testcontainers

Data

Oracle DB, PostgreSQL, pgvector, Flyway, Firebase, Supabase

Infra & Tools

Docker, Kubernetes, AWS, Jenkins, Autosys, Unix/Shell, Git, Dbeaver, NeoVim, VS Code, IntelliJ, Obsidian

AI Systems

RAG, embeddings & vector search, MCP, Agents, Codex, Claude Code

Practices

Agile/Scrum, system design, CI/CD, code reviews, AI development

CERTIFICATES

[Oracle Certified Java SE 17 Developer](#) [🔗](#), [OCI Generative AI Professional \(2025\)](#) [🔗](#), [Oracle DB 23ai](#) [🔗](#), [PL/SQL 19c](#) [🔗](#), [DeepLearning.AI AI For Everyone](#) [🔗](#), [DeepLearning.AI Generative AI for Everyone](#) [🔗](#), [O'Reilly Local LLM with python](#) [🔗](#)

ACHIEVEMENTS

Oracle Finergy AI Ideathon 2025, Top 5 Runner up, Oracle Financial Services Software

Oracle Code-Contest Winner 2024, Oracle Financial Services Software

HACKMAN.v6 Hackathon Winner 2023 [🔗](#), Dayananda Sagar College of Engineering, Bangalore

Solved 400+ DSA problems on LeetCode [🔗](#)

Polygon Bangalore Event Guild Lead [🔗](#), Polygon Blockchain
